Office Action Summary

Art Unit: 1615

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-33, 42-64, 71, drawn to pharmaceutical formulations, classified in class 424, subclass 486.
- II. Claims 34-41, 65-70, drawn to methods for treatment of diabetes, or for administration hypolipidemics, classified in class 514, subclass 866.

The inventions are distinct, each from the other because:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product can be used in an administration system other than that of (I) such as if same is adopted for transdermal application.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Claims 1-71 are generic to a plurality of disclosed patentably distinct species comprising compositions containing "extended release material" in inner and outer phases. Provisional election is mandatory of definite types of by hydrophobic and/or hydrophilic polymers to comprise each of the inner and outer phases. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Art Unit: 1615

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
